Galaxy 3 mail setup

Lindsey Snowling - 2019-01-16 - in E-Mail

1. From home > Settings > Accounts > Add account > Email > Other > Enter email address, Password.
2. Select manual setup > Select IMAP > Incoming server settings > For IMAP server put mail.xecu.net > Security is SSL > Port is 995 > Next.
3. Outgoing server settings > SMTP server is mail.xecu.net > Security is TLS > Port is 587 > Check require sign-in > Fill out username & password.
4. You will then be brought to 'account options' > Sync schedule set to every hour > Peak schedule every hour > Check sync email & notify.
5. On set up email give the account name IMAP Account & put your name > Select done.
